DETAILED ACTION

Claim Objections

1. Claims 1 and 8 are objected to because of the following informalities: in claim 1, line 3 “and” first instance should be deleted. In claim 8, line 3 “and” first instance should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. **Claim 8** rejected under 35 U.S.C. 103(a) as being unpatentable over Nakajima (JP 6-171381) in view of Koji (JP 7-94859).

Nakajima teaches assembling a crankshaft **2**, an intermediate shaft **9**, and a main input shaft **3**, and an output shaft (not labeled), mounting a primary gear **8** on the crankshaft **2**, mounting an intermediate shaft driven gear **10** (sub1) and an intermediate shaft driving gear **10** (sub2) together on a first end of the intermediate shaft **9**, mounting a clutch **T** on the main input shaft **3**, and engaging the intermediate shaft driven gear **10** (sub1) with the primary gear **8** of the crankshaft, and the intermediate shaft driving gear **10** (sub2) with a primary driven gear **11** of the clutch **T**.

Nakajima does not appear to teach a primary damper on the crankshaft. However, there is a mechanism above reference numeral **41** in figure 1 that may be a damper mechanism.

Koji clearly teaches a primary damper **21** on a crankshaft **12**.

Therefore, it would have been obvious to one of ordinary skill in the art, at the time of the invention, to have provided the invention of Nakajima with a damper on the crankshaft, in light of the teachings of Koji, in order to reduce vibration.

Allowable Subject Matter

4. Claims 1-7 are allowed.
5. Claims 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claim 8 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3726

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Interviews After Final

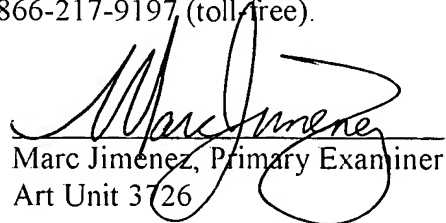

8. Applicant note that an interview after a final rejection will not be granted unless the intended purpose and content of the interview is presented briefly, in writing (the agenda of the interview must be in writing) to clarify issues for appeal requiring only nominal further consideration. Interviews merely to restate arguments of record or to discuss new limitations will be denied. See MPEP 714.13 and 713.09.
